Re: SORAD Request (DEP File #338-0594)
42 Mill Street, Westwood, MA

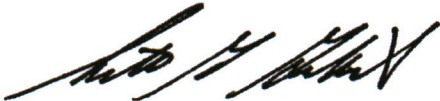

Dear Mr. Bogue:

On behalf of Anthony Delapa of Delapa Properties, we are pleased to submit this supplemental information to support the SORAD request for 42 Mill Street in Westwood, MA. Several plan changes were requested in response to the DEP site walk. Please find a plan enclosed revised on January 15, 2016 with the following changes:

1. Ditch between GC 53 and GC B20 is shown including spot elevations along the ditch bottom. Notice that at flag D7 there is a high point (elevation 195.1). From that point, the ditch splits in two directions. This proves that no jurisdictional hydrological connection exists between the two BVW systems through the ditch.
2. The non-jurisdictional ditches at the dam overflow are shown.
3. New plan date of January 15, 2016.

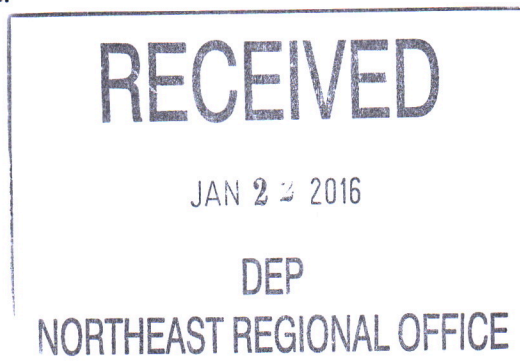

In summary, we request the Department to issue a Superseding Order of Resource Area Delineation (SORAD) finding that BVW is accurately delineated, that there is no perennial stream found on site, and no other wetland resource areas exists upgradient of what is defined.

Very truly yours,
GODDARD CONSULTING, LLC

Scott Goddard, Manager & PWS
