Hi Karon,

I'm looking into the relevance of the attached Massachusetts Inland Wetlands Restrictions Order for Westwood recorded at the Norfolk Registry of Deeds, Book 5033, Page 256 on 2/1/1974.

This restriction is of record against the 0 Mill St parcel mapping the pond on the lot as Wetland Area 44.

Unless amended by the DEP, except for the limited uses in Paragraph 3 (e.g., minimal-width access drives and underground utilities with surface restoration, approved under Section 40), the Order prohibits filling, excavating, dredging, grading, or altering contours/patterns of flow within Area 44; this would include residential foundations as a prohibited use.

Is this something that Delapa has already addressed in their applications to date?
